The requirement for the second assignment is to develop a schematic proposal for the site that incorporates the background information and analysis from the first phase to create a cohesive proposal for project site. The schematic proposal should address the following:

1. **Overall Concept**
   This can be done with images, diagrams, or in narrative form. Examples include “An Oasis of Health,” “Living with Water,” “Surviving and Thriving with the Sun,” “A Place for Everyone – Past, Present, and Future.”

2. **Development Program**
   This outlines the allocation of the site to various uses such as open space, urban farming, housing, industrial or manufacturing, offices, natural systems.

3. **Diagrammatic Site Plan**
   The site plan should show land use relationships, streets, paths, and access to adjacent properties or roadways.

4. **Description of how proposal meets EcoDistricts Protocol**
   - Imperatives
   - Priority areas (pick 2-3)
   - Initial calculations of energy, water, waste, food production, etc. (see EcoDistrict Indicators)
